

HACKATHON

What is a hackathon?

A Caliber Public Safety "hackathon" is an intense multi-day event where developers, designers, and entrepreneurs work together to create an app based on the hack-a-thon's general theme.

What is the general theme?

The theme revolves around the challenge question of "How might we improve officer's efficiency and access to information in the field?"

What is the timeline? 24-48 hours

May 1st – May 14th

- Define a team name
- Brainstorm on a solution
- Research technologies
- Develop an MVP that can be used to validate the idea with a customer and get feedback

May 15th Final preparations in Denver

May 16th Final Presentations and Voting

Hacking**

**May 16th - Final Presentations
and Dinner**

Denver Office

Guidelines

- If you are using an idea that is similar to an existing innovation idea or the same, please reach out to the innovation team and coordinate your efforts.
- Research and brainstorm on ideas but do not affect the existing sprint.
- Coding or development starts May 14th and goes to May 16th morning

Judge Selection

Ultimately, hack-a-thons are judged by what is accomplished. In addition, creativity, business sense, and pitch delivery will provide bonus points. A set of judges will oversee the process and take into account company votes.
